REVIEW SUMMARY · 4 OCTOBER 2026

WeLearn Growth Hub, ready for your review

One place for every course, project and simulation. This summary shows what the platform looks like today, what each person can do with it, and how you can help us make it better before it launches on welearn.org.

AT A GLANCE

Where we are today

Growth Hub brings courses, projects and hands-on science activities into one place, with its own dashboard for each person who uses it. The core platform is built and running on our test site.

Built around empathy for our users

The first stage of our own learning model is **Empathise**, and we build the platform the same way. Every screen aims to make the next step obvious, avoid overwhelming learners, and keep children's work private. Students decide what they share. Parents see only their own child. Coaches see only their own classes.

READY TO TRY

Students, ages 13–18

A calm Studio Home with one clear next step, three semester projects, guided goal setting, a personal portfolio and help from their coach.

READY TO TRY

Coaches

One workspace for their learners: projects, science activities, academic progress, goals and the school calendar.

READY TO TRY

School admins

Students, staff and parents, tuition and billing, material requests, programs and the school calendar.

READY TO TRY

Parents

A private, read-only view of their own child's projects, goals, progress and school events.

READY TO TRY

Junior Explorers, ages 6–11

Eight colourful science missions with read-aloud and big text, and levels for ages 6–8 and 9–11.

READY TO TRY

On any screen

Light and dark mode, on laptops, tablets and phones.

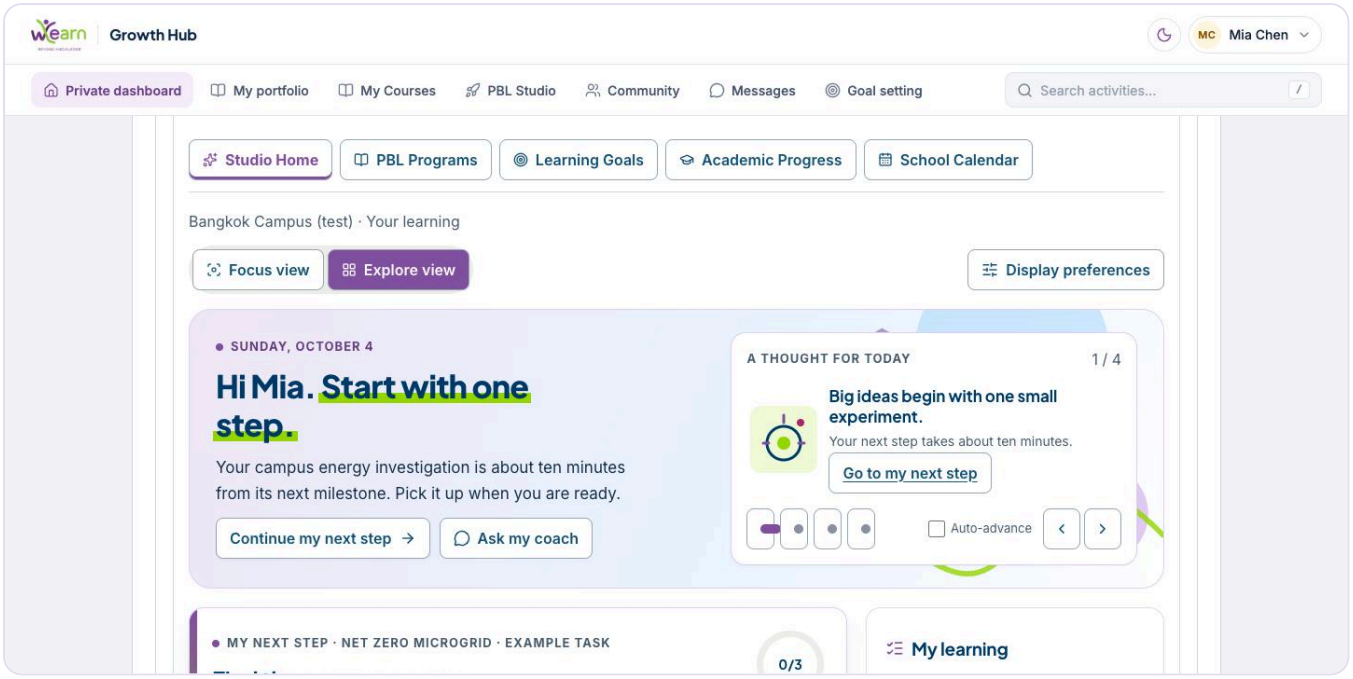

STILL POLISHING

- Some admin lists still show sample data.
- One heading on the coach dashboard is hard to read in light mode.
- Personal dashboard themes and portfolio sharing are finished and will be added to the test site soon.
- Automatic links to CambriLearn and Edmentum are waiting on access from those providers. For now, coaches record progress by hand.

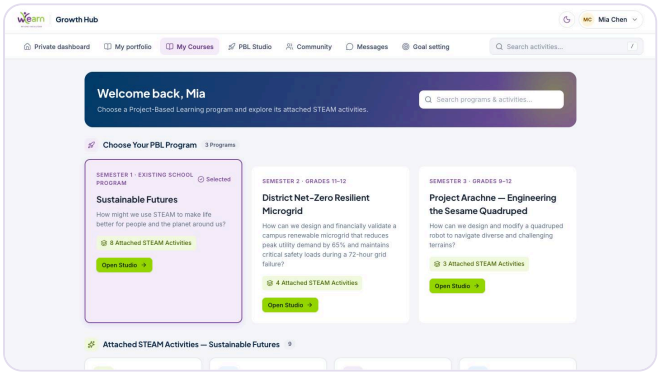

STUDENT DASHBOARD · AGES 13–18

A calm studio that makes the next step obvious

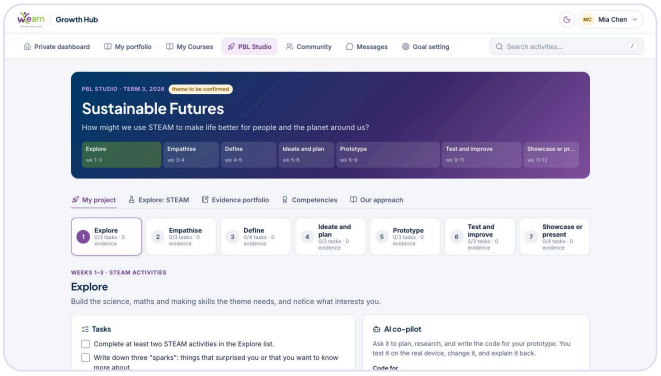

Learners see one manageable next step, the project they're in, and where to get help.

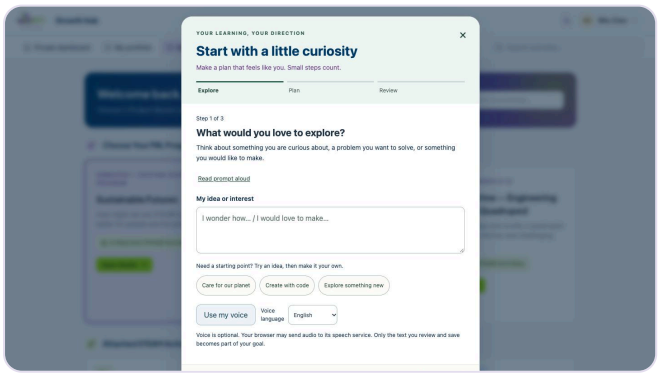

Studio Home. A friendly greeting, the next task with a progress ring, and an encouraging thought for the day.

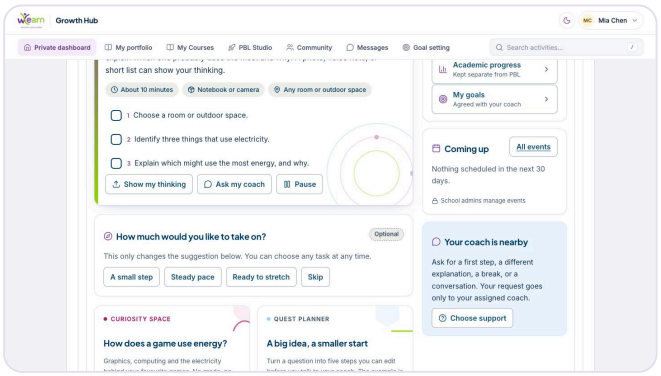

My Courses. Choose one of three semester projects and see the science activities that go with it.

Project Studio. Seven stages from Explore to Showcase, with tasks and a helpful AI co-pilot.

Goal setting. A simple three-step guide: explore, plan, review.

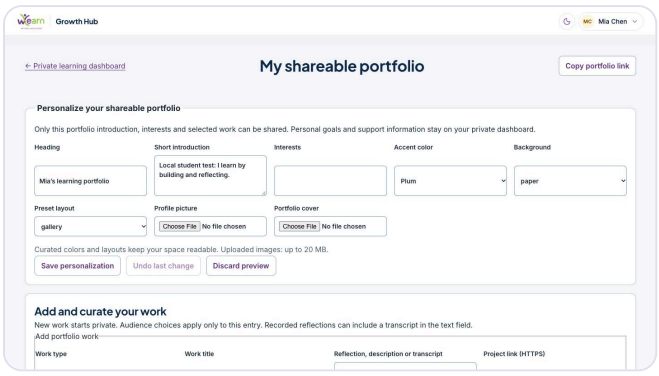

Your pace. Learners choose how much to take on, with a curiosity space and a quest planner.

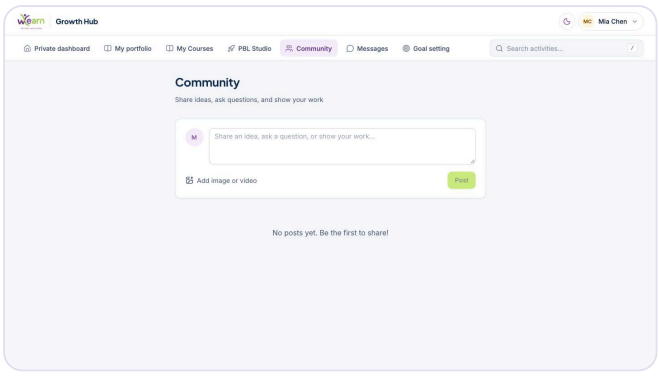

STUDENT DASHBOARD, CONTINUED

Their work, their choice to share

Every new piece of work starts private. Students choose who sees each item, and personal goals are never shared.

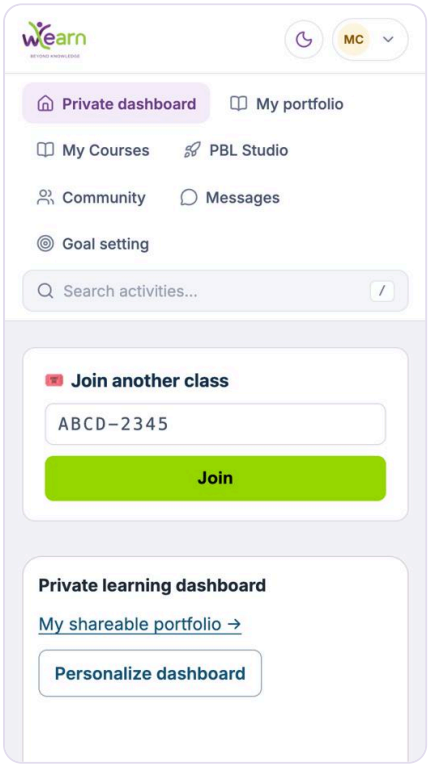

Shareable portfolio. Add reflections, code, 3D models, images, audio and video.

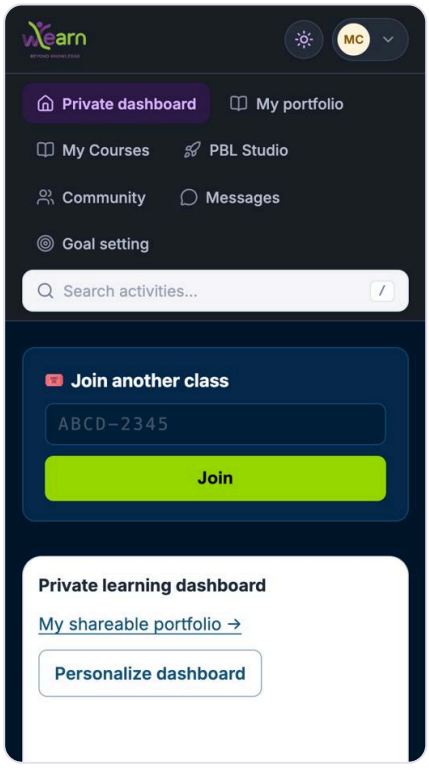

Community. Share ideas, questions and work with classmates.

Works on a phone, in light or dark

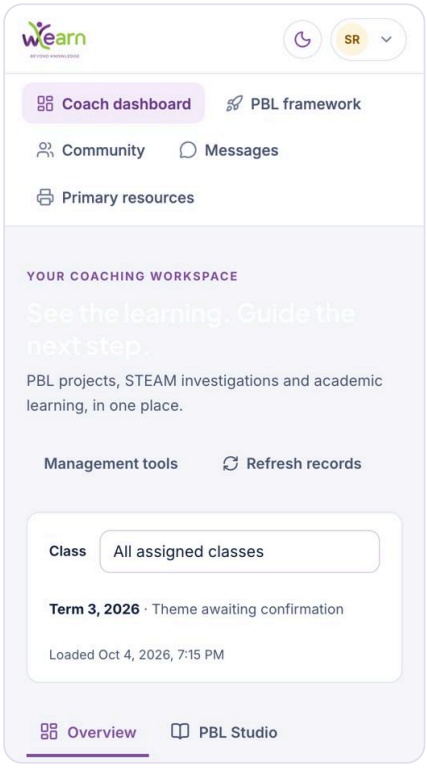

Navigation wraps and cards stack, so the dashboard is comfortable at phone width.

Student, light mode

Student, dark mode

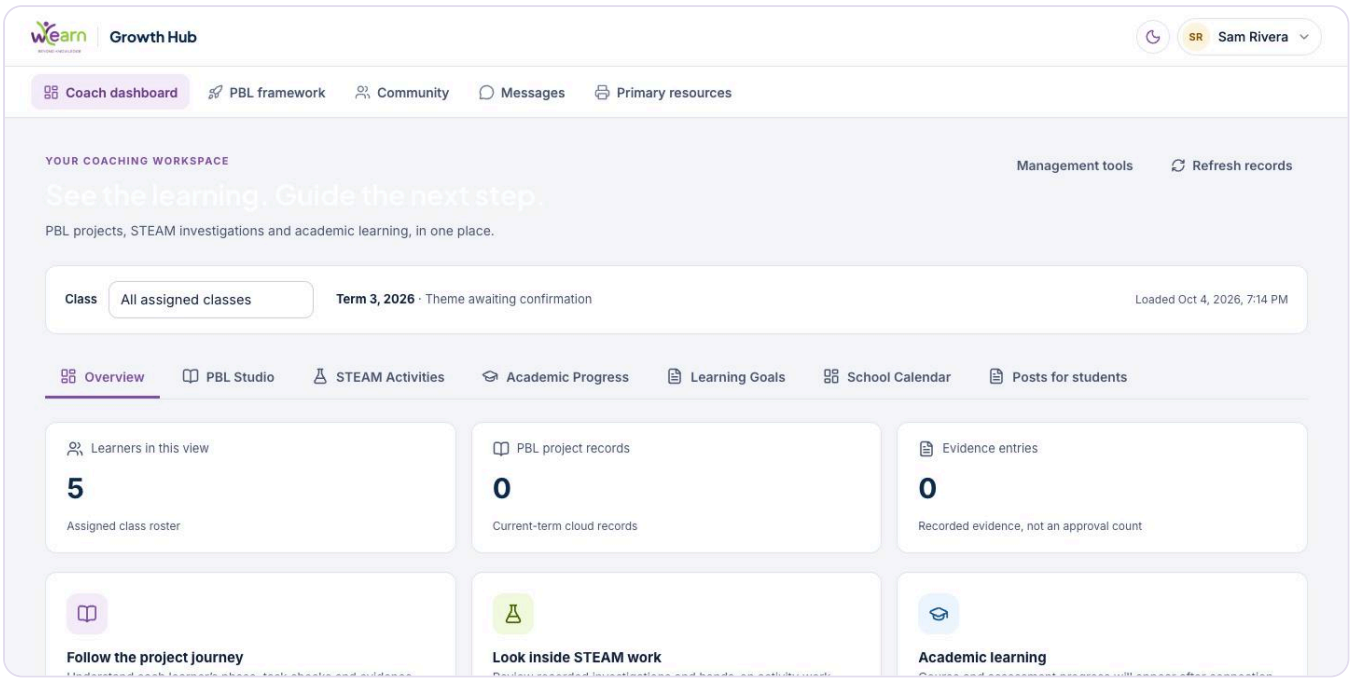

Coach, on a phone

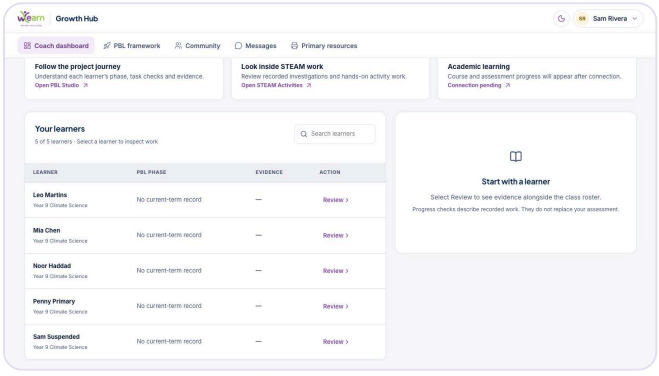

COACH DASHBOARD · LAPTOP FIRST

See the learning, guide the next step

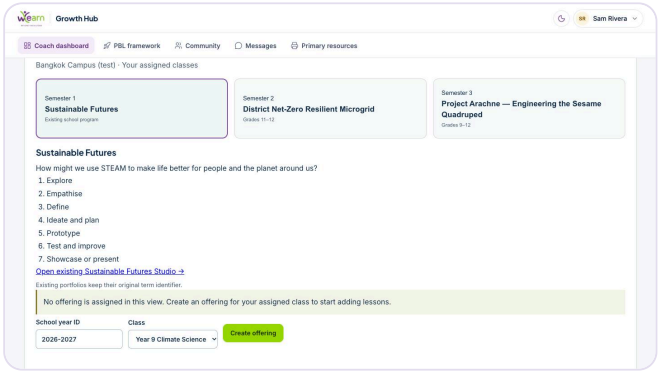

Coaches see only their own classes. The dashboard points to who needs help rather than showing a wall of numbers.

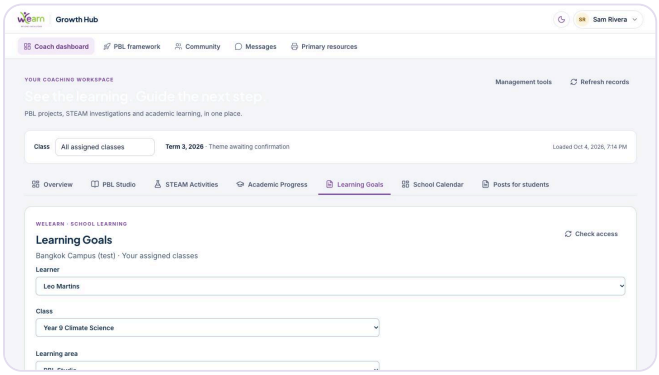

Overview. Pick a class and jump into projects, science activities or academic learning.

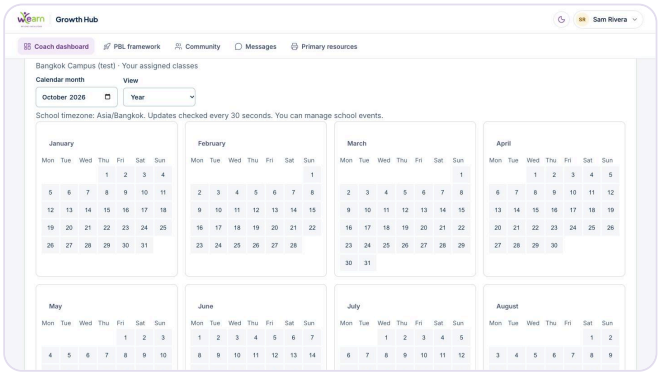

Your learners. Search the class and open any learner to review their work.

Projects. Choose a semester project for a class and publish lessons.

Learning goals. Set clear, measurable goals with due dates.

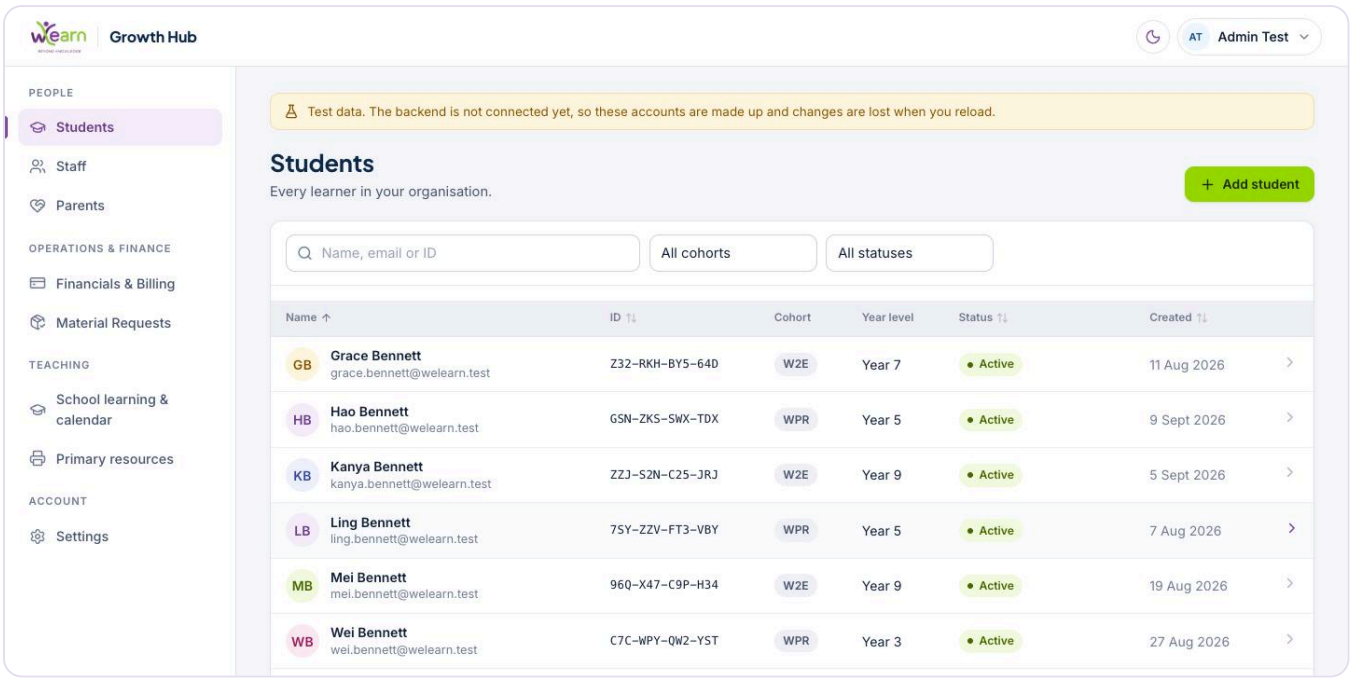

School calendar. The same calendar every role sees.

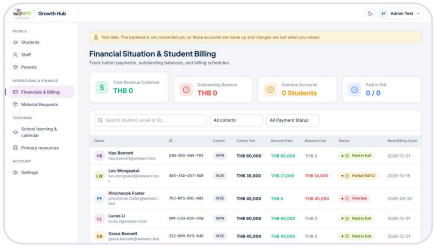

SCHOOL ADMIN DASHBOARD

Run the school from one place

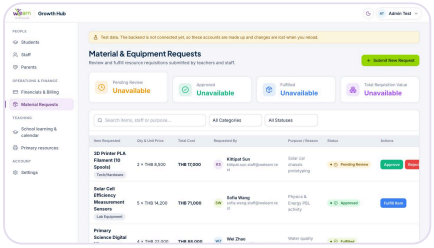

People, money, materials and teaching in one menu. Only admins can change the shared school calendar.

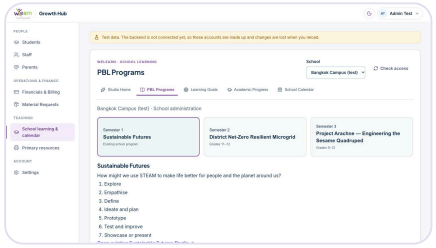

Students. Every learner, with search and filters for year group and status. Staff and parents are listed the same way.

Financials & billing. Paid, partly paid and overdue at a glance.

Material requests. Approve and fulfil what coaches need for lessons.

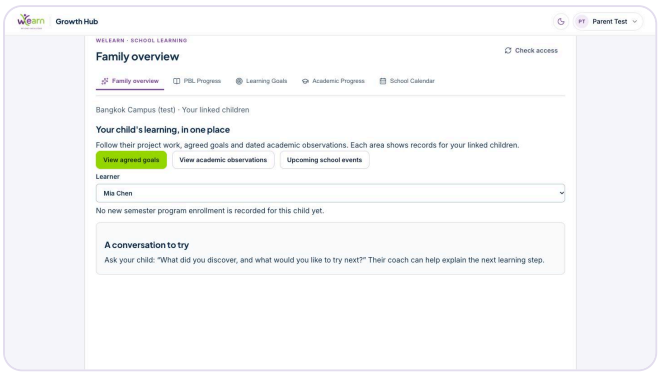

School learning. Set up the three semester projects for each class.

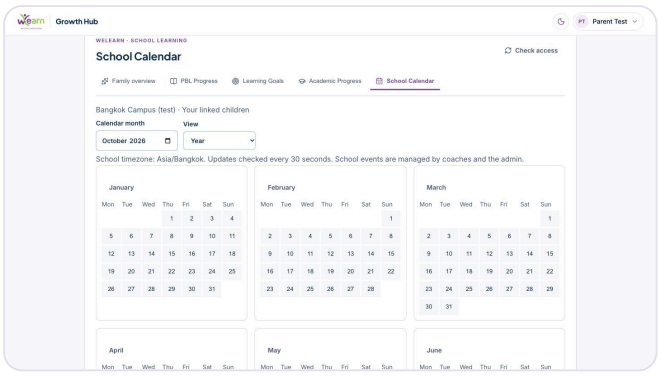

PARENT DASHBOARD

Clear and private for families

Parents link their child with a one-time code from the school. They never see other children or private coach notes.

Family overview. Projects, goals and progress, plus a weekly conversation starter to use at home.

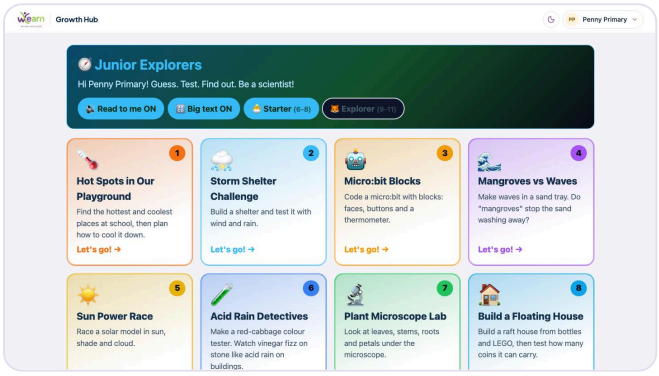

School calendar. Upcoming school events.

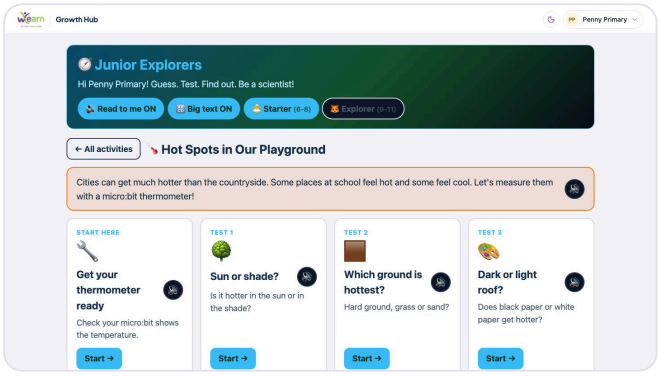

JUNIOR EXPLORERS · AGES 6–11

Guess. Test. Find out. Be a scientist!

Fewer buttons, bigger text and read-aloud for our youngest learners, with printable worksheets for teachers.

Eight missions, from Hot Spots in Our Playground to Build a Floating House.

Hot Spots. Get started, then three simple tests.

YOUR TURN

Log in, explore, and tell us what you think

Your honest first impressions are the most valuable input we can get right now.

How to log in

1. Go to **https://dnd-master-73449.web.app**. This is our test site until welearn.org is connected.
2. Enter one of the email addresses below and the password **review123**.
3. To try another role, open the menu next to your name (top right), sign out, and log in again.

ROLE	EMAIL	WHAT TO TRY
Student (secondary)	`akira@welearn.org`	Studio Home, personalise your dashboard, private goals, portfolio, ask your coach
Student (secondary)	`mia@school.edu`	Choose a course, track progress, send a support request
Student (primary)	`primary.student@school.edu`	Junior Explorers missions, read-aloud and big text
Coach	`coach.wpr@school.edu`	Class roster, create a lesson, review student work, calendar
Admin	`admin.test@school.edu`	Users, billing, material requests, school calendar
Parent	`parent.test@school.edu`	Your child's progress and upcoming events
Supervisor	`supervisor.test@school.edu`	Campus-level user and class management

What we'd like to know

- **First impression:** was it clear what to do?
- **Ease of use:** where did you get stuck?
- **Look and feel:** easy to read, in light and dark mode, on your phone?
- **Missing:** what did you expect to find?
- **Problems:** anything broken or slow.

When you report something

- The account you used
- What you were trying to do
- Your device and browser
- A screenshot, if you can

What happens next

After we have your feedback and have made improvements, students from different age groups (primary, lower secondary and upper secondary) will test the platform under guidance and supervision.

These are test accounts for review only. Please don't share them outside our team. They will be reset before launch. Screenshots show test accounts with sample names, not real students.
