

Course catalogue and public guidebook

To: David Doran, Founder & CEO · **From:** Mani Golzary, Platform Lead · **Date:** 25 September 2026 · **Accompanies:** Implementation Plan, version 2

Why this addendum

After reviewing the walkthrough of our previous WeLearn course system, the plan now also includes our **course catalogue**: around 1,030 courses from partner schools such as Florida Virtual School and Brigham Young University, a full course editor for staff, and a **public course guidebook** that families can search. The updated plan (version 2) is attached.

What is added

Feature	When	Effect on go-live date
Course editor : provider, year levels, subjects, length, delivery type, credits, prerequisites, fees, accreditations, review status; every text field translatable	Phase C	None: part of the catalogue already planned
Import of our existing ~1,030 courses into a review queue. AI drafts the clean-up and Thai/Chinese translations; staff approve each course	Phase C, alongside the Edmentum work	None
Public course guidebook : search, filters (provider, subject, grade, accreditation, length) and a page for every course	Weeks 9–13, alongside the Edmentum work	None
Buy Course, Add to Path (a student's personal study plan), enquiries and course bookings	New Phase G, after the pilot	Go-live unchanged; Phase G adds 3–4 weeks afterwards

Timeline. Go-live stays at an estimated **5–6 months**. The catalogue and guidebook are built in parallel with the Edmentum connection. Buying courses and study paths follow as Phase G once the platform is live and proven with the pilot.

What we need

Item	Who	When
Export of the existing course data from the previous system	Platform Lead with the previous developer	Before Phase C
Staff time to approve imported courses, and confirmation from partner schools that courses and prices are current	Course coordinators	Phase C onward
How "Buy Course" works (online payment or enquiry) and what a study path contains	Platform Lead, for your approval	Before Phase G

Cost impact

No new licence and no change to the running costs in the plan. The only additions are staff time to review imported courses and, if "Buy Course" takes payments online, the payment provider's per-transaction fees. All durations are estimates.
