

FOR COLLEAGUE REVIEW AND FEEDBACK

# WeLearn Growth Hub Platform status and review pack

What has been built so far, what every screen looks like today, and the checklist of what is left before we go live. Please mark up anything you would change.

**DATE**

28 September 2026

**STAGE**

Phase 0 (front-end  
groundwork) complete

**PLATFORM LEAD**

Mani Golzary

## Where the platform is today

WeLearn Growth Hub is being built as one learning platform for all our cohorts: students open their courses, the PBL/STEAM simulations and other materials in one place, and staff, teachers and parents each see what they need. Phase 0 of the implementation plan (the screens and groundwork that need nothing from the school) is now finished and tested.

**Important: nothing in this pack is live yet.** Every screenshot was taken from the platform running on a test system with made-up accounts (for example "Mia Chen", "Bangkok Campus (test)"). The live website has not been changed. Going live needs the school actions on page 22, starting with the Firebase billing plan.

# 34

real screenshots across 7 areas

# 16

learning activities (8 secondary, 8 primary)

# 24

printable worksheets and teacher guides

# 3

interface languages: English, 中文, ไทย

# 341

automated checks passing (255 app, 57 security, 29 server)

# 6

roles: admin, supervisor, teacher, student, primary learner, parent

## How to read the status tags

### ● Working

Built and checked on the test system, with the new design.

### ● Partly done

Works, but something listed in the caption is still missing.

### ● Older design

Works, but still has the earlier dark look. It will be restyled to match the new screens.

### ● Not built yet

Planned in a later phase.

### ● Needs the school

Waiting for a decision, account or approval from the school.

## How to give feedback

Every screen has a number (for example **6.4**). Please refer to it in your comments, and use the feedback form on the last page. Each screen also carries one question we would especially like your view on. Comments on wording, what is missing, what confuses you, and what you would use every day are all welcome.

# Signing in

1

## 1.1 Sign in

● Working

One sign-in page for every role. The platform decides what each person sees from their account, so nobody has to choose "student" or "teacher". Language can be switched before signing in. Wrong passwords get a plain message, not a technical code.

**Question:** Should students be able to create their own accounts here, or should every account be created by the school?

## 1.2 Forgot password

● Working

Sends a real password-reset email. It gives the same answer whether or not the email has an account, so it cannot be used to find out who is enrolled.

# Students

2

## 2.1 My Courses (the student's home page)

● Partly done

**WLearn** | Growth Hub MC Mia Chen

Home My Courses Goal setting

**Welcome back, Mia**  
Everything you are learning, in one place.

**WeLearn PBL/STEAM** 9

|                                                                                                                              |                                                                                                                                            |                                                                                                                                     |                                                                                                                                    |

Where students land after signing in: every course and activity in one place, with search. The eight WeLearn PBL/STEAM activities open today. Edmentum courses and teacher materials have their own sections, which show a "coming" note until Edmentum is connected (Phase B) and teachers can upload (Phase C). Students who are not in a class yet also see a "Join your class" box here.

**Question:** What else should a student see first thing: deadlines, next lesson, messages from the teacher?

## 2.2 Finding an activity

● Working

The screenshot shows the WeLearn Growth Hub interface. At the top, the logo 'wlearn' and 'Growth Hub' are visible. A user profile 'MC Mia Chen' is in the top right. Below the logo, there are navigation links: 'Home', 'My Courses', and 'Goal setting'. A search bar is located in the top right, containing the text 'so'. Below the search bar, there is a notification for 'ACTIVITY 5 Solar Car' with the description 'Measure your real model car and predict...'. The main content area has a dark blue background. It starts with a welcome message 'Welcome back, Mia Chen' and 'Year 9 Climate Science · Ages 13-15'. Below this is a section 'Join another class' with a text input field containing 'ABCD-2345' and a green 'Join' button. Underneath is a 'Your Notes' section with a text input field for 'Note title', another for 'What did you learn?', and a green 'Add Note' button. At the bottom of the notes section, it says 'No notes yet. Add your first note above.'

Search from any page (press "/" ). It replaced a bar of twelve buttons.

## 2.3 An activity: Solar Car Challenge

Older design

The screenshot shows the 'Solar Car Challenge' activity page. At the top, there's a navigation bar with 'Home', 'My Courses', and 'Goal setting'. A search bar shows 'Now: Activity 5: Solar Car - search'. The main content area has a dark blue header with the title 'Solar Car Challenge' and a brief description: 'Build a car. Then measure it: every part on a scale, the panel with a ruler and a multimeter, the gears by counting teeth. This page turns those measurements into a prediction of how fast your car will go — and then you go and find out whether it was right.' Below this is a row of six stage buttons: 'STAGE 1 Weigh It' (highlighted), 'STAGE 2 Your Panel', 'STAGE 3 Gear It', 'STAGE 4 Find Balance', 'STAGE 5 Test It', and 'STAGE 6 Design Review'. Underneath these is a table with six columns: 'TOTAL MASS', 'PANEL POWER', 'WATTS PER KG', 'GEAR RATIO' (showing '1:1'), 'PREDICTED SPEED', and 'BALANCE SCORE'. A link 'Show the maths — how every number above was worked out' is below the table. The main content area then shows 'Stage 1 — Weigh every part of the car you built' with instructions: 'Put each part on a kitchen scale before you fit it. Enter what the scale says, not what the packet claims. If you have four identical wheels, weigh one and set the quantity to 4. Add rows for anything your car has that is not listed — and delete anything it does not.' There's a text input field for 'Team or car name' with the example 'e.g. Sunchaser Mk1'.

Students build a real model car, measure it and predict its speed. The activities work, but still have the earlier dark look under the new navigation bar. Restyling them is on the list.

## 2.4 An activity: Project Hex-Grid

Older design

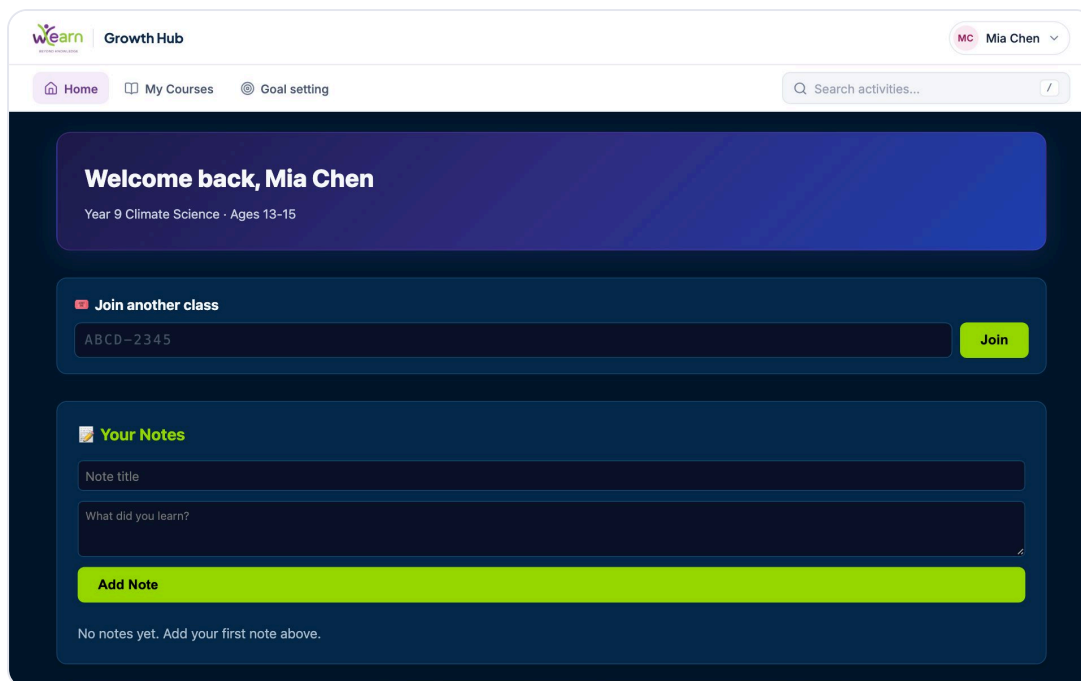

The screenshot shows the 'Project Hex-Grid' activity page. The navigation bar is the same as in the previous screenshot. The main content area has a dark blue header with the title 'Project Hex-Grid' and a brief description: 'A floating city for a drowning Bangkok. Test your ideas against real data.' Below this is a row of six buttons: 'Mission' (highlighted), 'How to play', 'Build & explore', 'Test a hypothesis', 'Lab log', and 'Sources & limits'. The main content area then shows 'The brief' with the text: 'Bangkok is drowning and there is only one way out: up, above the waves. Each of you owns one platform system. Together the platforms become a self-sufficient floating city.' Below this is a row of five data cards: '0-2 m' (Bangkok's height above sea level), '1.3-2.3 cm' (sea level rise per year reported for the area), '2030-2034' (period experts flag as highest flood risk (2031 especially)), '1.44 trillion \$' (economic damage from the 2011 floods), and '~30 yrs → ~1 yr' (major flooding shifting from a 30-year cycle towards almost every year). A source note is below these cards: 'Source: The Nation Thailand (30 May 2026) - "Bangkok warned of major flood risk by early 2030s". Figures as the article reports them.' At the bottom, there's a section 'Choose your role' with four buttons: 'Livestock' (Choose what animals to raise), 'Agriculture', 'Nutrition & Physical Health' (Calculate nutritional needs of the), and 'Waste Management'.

A floating-city project for Bangkok, with real published figures and their sources.

**Question:** Which activities do you use most? We will restyle those first.

## 2.5 Student Home (notes and class joining)

● Older design

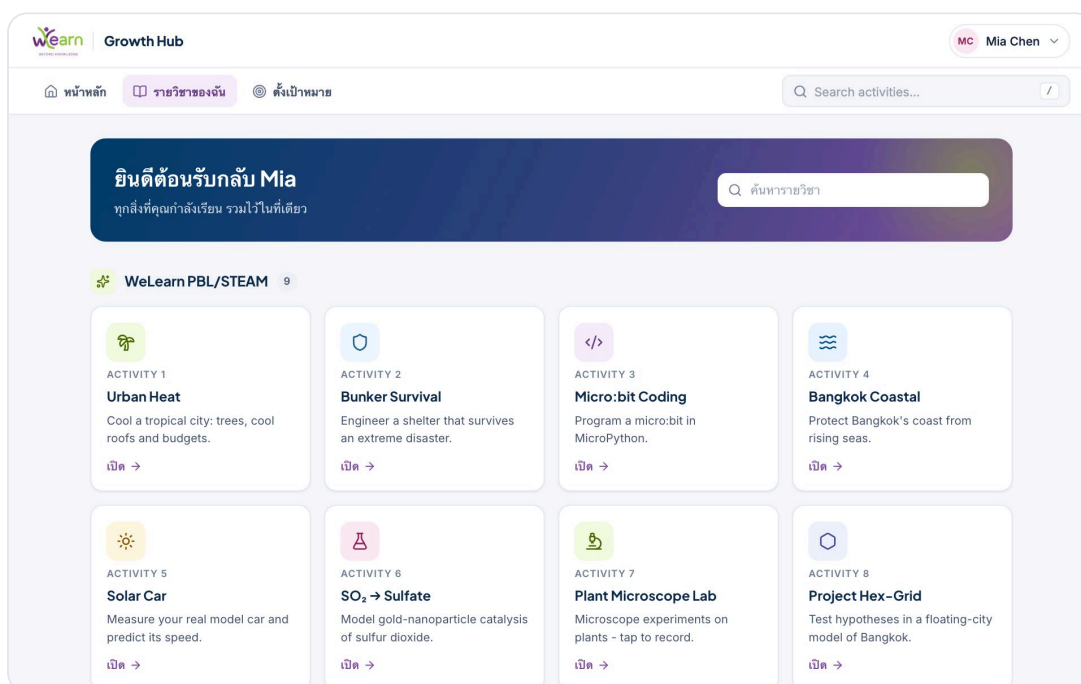

The earlier student home: notes, join another class, goals, and the older activity list further down.

**Question:** Keep this as a separate page, or fold notes and goals into My Courses?

## 2.6 The platform in Thai

● Partly done

Menus, buttons and messages on the new screens are available in English, Chinese and Thai. Still in English: activity names, descriptions and the activity search. The Chinese and Thai text are first drafts and need a native-speaker check.

**Question:** Could a Thai-speaking and a Chinese-speaking colleague read through these screens?

## 2.7 Settings: language and password

● Working

 Growth Hub

MC Mia Chen

[Home](#) [My Courses](#) [Goal setting](#)

### Settings

Your account, language and password.

**Your account**

**Mia Chen**  
mia@school.edu  
**Student**

**Language**

Used for menus and messages on this device and saved to your account.

**English** 中文 ไทย

**Change password**

You will need your current password.

**Current password**

**New password**

Everyone can change the language (saved to their account, so it follows them to other devices) and change their password. Both work for real, not just on test data.

# Junior Explorers

| <b>5</b><br><br><b>Sun Power Race</b><br>Race a solar model in sun, shade and cloud.<br><b>Let's go! →</b>                                                | <b>6</b><br><br><b>Acid Rain Detectives</b><br>Make a red-cabbage colour tester. Watch vinegar fizz on stone like acid rain on buildings.<br><b>Let's go! →</b> | <b>7</b><br><br><b>Plant Microscope Lab</b><br>Look at leaves, stems, roots and petals under the microscope.<br><b>Let's go! →</b> | <b>8</b><br><br><b>Build a Floating House</b><br>Build a raft house from bottles and LEGO, then test how many coins it can carry.<br><b>Let's go! →</b> |

All eight primary activities are playable: Hot Spots, Storm Shelter, Micro:bit Blocks, Mangroves vs Waves, Sun Power Race, Acid Rain Detectives, Plant Microscope Lab and Floating House. Each one is a real hands-on investigation with the school's kit. Read-aloud and big text are on by default. Two levels: Starter (6–8) and Explorer (9–11).

**Question:** Do the activities match the kit and space you have? Is anything unsafe or unrealistic for your class?

### 3.2 An activity: build first, then tests

● Working

**Junior Explorers**  
Hi Penny Primary! Guess. Test. Find out. Be a scientist!

Read to me ON Big text ON Starter (6-8) Explorer (9-11)

← All activities 🔍 Hot Spots in Our Playground

Cities can get much hotter than the countryside. Some places at school feel hot and some feel cool. Let's measure them with a micro:bit thermometer!

**START HERE**  
Get your thermometer ready  
Check your micro:bit shows the temperature.  
Start →

**TEST 1**  
Sun or shade?  
Is it hotter in the sun or in the shade?  
Start →

**TEST 2**  
Which ground is hottest?  
Hard ground, grass or sand?  
Start →

**TEST 3**  
Dark or light roof?  
Does black paper or white paper get hotter?  
Start →

Every activity starts with a build or setup, then two or three fair tests. Children can print their worksheet from here.

### 3.3 Get ready

**Junior Explorers**  
Hi Penny Primary! Guess. Test. Find out. Be a scientist!

Read to me ON Big text ON Starter (6-8) Explorer (9-11)

← Back 🔍 Sun or shade?

1. Get ready 2. My guess 3. Do it 4. Look & record 5. What happened

Tap each thing when you have it

Your micro:bit thermometer A sunny spot and a shady spot

**Stay safe**  
• Wear a hat and drink water outside.  
• Stay where your teacher can see you.

Tick off the kit. No typing anywhere: children tap.

### 3.4 My guess

**Junior Explorers**  
Hi Penny Primary! Guess. Test. Find out. Be a scientist!

Read to me ON Big text ON Starter (6-8) Explorer (9-11)

← Back 🔍 Sun or shade?

1. Get ready 2. My guess 3. Do it 4. Look & record 5. What happened

? Is it hotter in the sun or in the shade?

I think it will be hotter...

In the sun In the shade Both the same

How sure are you?

Choose a prediction and how sure they are.

### 3.5 Look and record: a real temperature

● Working

Wear Growth Hub PP Penny Primary

**Junior Explorers**  
Hi Penny Primary! Guess. Test. Find out. Be a scientist!

Read to me ON Big text ON Starter (6-8) Explorer (9-11)

← Back **Sun or shade?**

1. Get ready 2. My guess 3. Do it 4. Look & record 5. What happened

In the sun ✓ In the shade

Now recording: In the sun

What does the micro:bit say?

38 °C

-5 +5  
-1 +1  
Start again

Readings from the micro:bit thermometer are entered with big + and – buttons. There is also a stopwatch for timed tests (Explorer level).

### 3.6 What happened

● Working

Wear Growth Hub PP Penny Primary

**Junior Explorers**  
Hi Penny Primary! Guess. Test. Find out. Be a scientist!

Read to me ON Big text ON Starter (6-8) Explorer (9-11)

← Back **Sun or shade?**

1. Get ready 2. My guess 3. Do it 4. Look & record 5. What happened

MY GUESS  
I think it will be hotter in the sun.

MY RESULTS SAY  
In the sun it was 38 °C. In the shade it was 31 °C.

Was your guess right?

The result is written only from what the child recorded ("In the sun it was 38 °C. In the shade it was 31 °C."). The platform suggests whether the guess was right, and the child decides.

**Question:** Is the language right for 6–8-year-olds? What would you change?

# Hands-on worksheets and teacher guides

4

## 4.1 Primary resources

Working

**Primary hands-on resources**

A pupil worksheet and a teacher guide for every Junior Explorers activity. Each worksheet comes in Starter (6–8) and Explorer (9–11) versions.

- ACTIVITY 1: Hot Spots in Our Playground**  
Where is the hottest place at our school, and how could we cool it down?  
60–90 minutes (mostly outdoors) · Groups of 3  
Worksheet, Teacher guide
- ACTIVITY 2: Storm Shelter Challenge**  
How do we build a shelter that stays standing and dry in a storm?  
60 minutes · Groups of 3–4  
Worksheet, Teacher guide
- ACTIVITY 3: Micro:bit Blocks**  
How do we give a tiny computer instructions?  
60 minutes · Pairs (driver and navigator, swap halfway)  
Worksheet, Teacher guide
- ACTIVITY 4: Mangroves vs Waves**  
How can nature protect our coast from waves?  
50–60 minutes · Groups of 3–4  
Worksheet, Teacher guide
- ACTIVITY 5: Sun Power Race**  
How can sunlight make things move?  
45–60 minutes (outdoors) · Groups of 3  
Worksheet, Teacher guide
- ACTIVITY 6: Acid Rain Detectives**  
How can we detect acid, and what does acid rain do to stone?  
60 minutes · Groups of 3, with an adult nearby  
Worksheet, Teacher guide
- ACTIVITY 7: Plant Microscope Lab**  
What are plants made of?  
60 minutes · Pairs at each microscope  
Worksheet, Teacher guide
- ACTIVITY 8: Build a Floating House**  
How can we build a house that floats safely in a flood?  
60–75 minutes · Groups of 3–4  
Worksheet, Teacher guide

For every primary activity: a pupil worksheet (Starter and Explorer versions) and a teacher guide. They are generated from the same content as the app, so paper and screen always match. Ready-made PDFs of all 24 are available.

## 4.2 Pupil worksheet

**Storm Shelter Challenge**

My name: \_\_\_\_\_ Class: \_\_\_\_\_ Date: \_\_\_\_\_

**How do we build a shelter that stays standing and dry in a storm?**  
Big storms bring strong wind and heavy rain. People need shelters that stay standing and keep them dry. Can you build one?

**My kit** tick when you have it

- ☐ LEGO bricks and a base plate
- ☐ Card for a roof
- ☐ A small piece of tissue
- ☐ The same number of bricks for two shelters
- ☐ A desk fan with three speeds
- ☐ Card for a flat roof and a sloped roof
- ☐ A spray bottle of water
- ☐ Two dry pieces of tissue

**Stay safe**

- Keep small bricks away from little children.
- Keep fingers away from the fan blades.
- An adult switches the fan on and off.
- Keep water far away from the fan and plugs.
- Wipe up spills so nobody slips.

**STEAM in this activity**

|                                                                     |                                                                     |                                                                       |                                                              |                                                             |
|---------------------------------------------------------------------|---------------------------------------------------------------------|-----------------------------------------------------------------------|--------------------------------------------------------------|-------------------------------------------------------------|
| <b>S</b> SCIENCE<br>Wind pushes on buildings; rain runs off slopes. | <b>T</b> TECHNOLOGY<br>A fan and spray bottle model a storm safely. | <b>E</b> ENGINEERING<br>Design, test, improve: the engineering cycle. | <b>A</b> ART<br>Design and colour a storm-proof dream house. | <b>M</b> MATHS<br>Count bricks and put fan speeds in order. |
|---------------------------------------------------------------------|---------------------------------------------------------------------|-----------------------------------------------------------------------|--------------------------------------------------------------|-------------------------------------------------------------|

**Before the lesson**

- Put the same number of LEGO bricks in a bag for each group.

**Safety**

- Keep small bricks away from little children.

**START HERE: BUILD** Build your shelter

1. DO IT: TICK EACH STEP

Circle a guess, tick steps, record results, draw, plus an Art corner and a Maths corner. Starter has no writing lines.

## 4.3 Teacher guide

**Storm Shelter Challenge**

**How do we build a shelter that stays standing and dry in a storm?**  
Big storms bring strong wind and heavy rain. People need shelters that stay standing and keep them dry. Can you build one?

**TIME** 60 minutes

**GROUPS** Groups of 3–4

**AGES** Starter 6–8 · Explorer 9–11

**Learning goals**

- I can build a shelter that stands up by itself.
- I can test my shelter with wind and rain, fairly.
- I can improve my design after testing it.

**STEAM in this activity**

|                                                                     |                                                                     |                                                                       |                                                              |                                                             |

|-----------|---------|------------|
| v1        | 3.20 kg | Brushed DC |

Teachers see only the students in their own classes: progress, time on the platform, goals and activities. It works, but has the earlier design, and the "Registered coaches" count shows 0 (see issues, page 23). The gradebook (Phase D) will add grades from Edmentum and PBL rubrics.

**Question:** What do you look at every day? What is missing from this dashboard?

## 6.4 One account

● Working

The screenshot shows the WeLearn Growth Hub interface. On the left is a sidebar with navigation links: PEOPLE (Students, Staff, Parents), TEACHING (Primary resources), and ACCOUNT (Settings). The main content area is titled 'Mia Chen' with a 'Student' role and 'Active' status. Below the name are fields for ID (STD-CHN-XYZ-987), email (mia@school.edu), and campus (Bangkok Campus (test)). The 'Details' tab is selected, showing a table of account information:

| Details                |                                    |
|------------------------|------------------------------------|
| Given names            | Surname                            |
| Mia                    | Chen                               |
| Phone                  | Gender                             |
| —                      | —                                  |
| Class                  | Cohort                             |
| Year 9 Climate Science | W2E (twice-exceptional, secondary) |
| Age band               | Year level                         |
| 13-15                  | Year 9                             |
| Dual programmes        | Date of birth                      |
| —                      | —                                  |
| Last sign-in           | Created                            |
| 28 Sept 2026, 11:05    | 28 Sept 2026, 10:58                |
| Last changed           |                                    |
| 28 Sept 2026, 11:05    |                                    |

On the right, the 'Actions' panel includes: Edit details, Change email, Issue parent invite code, and Suspend. A user profile for 'Admin Test Administrator' is visible in the bottom left.

Details, linked parents, and actions: edit details, change email, issue a parent invite code, suspend. Every change is recorded in the account history, which nobody can edit or delete.

## 6.5 Account history

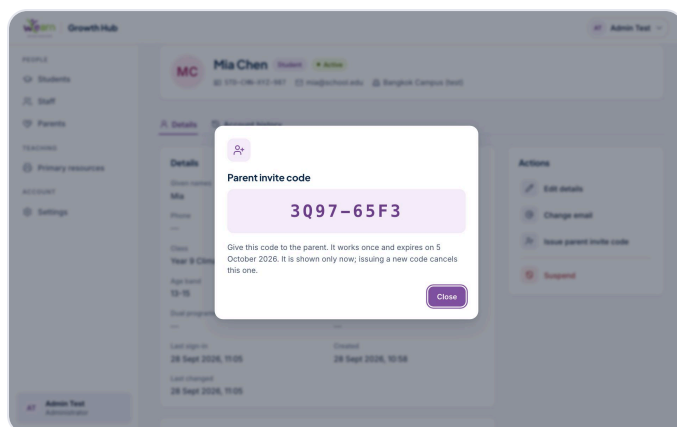

● Working

The screenshot shows the same WeLearn Growth Hub interface, but with the 'Account history' tab selected. The history list shows two events:

- Parent invite code issued** (Admin Test) on 28 Sept 2026, 11:01
- Linked parent.test@school.edu to Mia Chen** (Seed Script) on 28 Sept 2026, 10:58

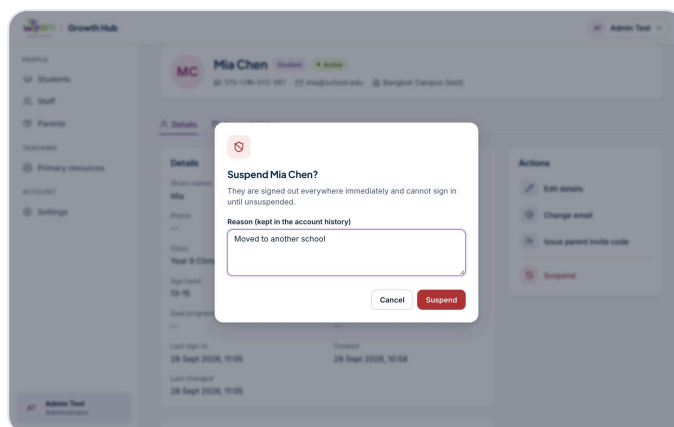

At the bottom of the history list, it says 'Displaying 1-2 of 2' with navigation arrows. The 'Admin Test Administrator' profile remains in the bottom left.

## 6.6 Parent invite code

Parents link to a child with a one-time code from the school, never by typing an email, which would let anyone attach themselves to any child. Codes expire after 7 days.

## 6.7 Suspend an account

A reason is required and kept in the history. The person is signed out everywhere at once.

## 6.8 Add a student

- **Partly done**

Staff never choose or see a password: the new user gets an email to set their own. **Until the school's Microsoft 365 no-reply mailbox exists, no email is sent**, and the screen says so honestly. Primary learners stay "pending" until a parent gives consent.

**Question:** Which details must we collect for each student, and which should we not collect at all?

## 6.9 Supervisor view (read-only)

● Working

The screenshot shows the 'Students' page in the WeLearn Growth Hub. The left sidebar contains navigation links for PEOPLE (Students, Staff, Parents), TEACHING (Primary resources), and ACCOUNT (Settings). The main content area is titled 'Students' and includes a sub-header 'Every learner in your organisation.' Below this is a notification: 'You can view accounts. Only administrators can change them.' A search bar and filters for 'All cohorts' and 'All statuses' are present. A table lists student accounts with columns for Name, ID, Cohort, Year level, Status, and Created. The table shows seven students, including Tom Becker, Mia Chen, Inès Dupont, Noor Haddad, Leo Martins, Penny Primary, and Sam Suspended. The bottom of the page shows 'Displaying 1-7 of 7' and 'Per page 30'.

| Name                                          | ID              | Cohort | Year level | Status             | Created      |
|-----------------------------------------------|-----------------|--------|------------|--------------------|--------------|
| Tom Becker<br>tom@school.edu                  | STD-BCK-RXY-Z98 | W2E    | Year 12    | Active             | 28 Sept 2026 |
| Mia Chen<br>mia@school.edu                    | STD-CHN-XYZ-987 | W2E    | Year 9     | Active             | 28 Sept 2026 |
| Inès Dupont<br>ines@school.edu                | STD-DPN-TXY-Z98 | W2E    | Year 12    | Active             | 28 Sept 2026 |
| Noor Haddad<br>noor@school.edu                | STD-HDD-DXY-Z98 | W2E    | Year 9     | Active             | 28 Sept 2026 |
| Leo Martins<br>leo@school.edu                 | STD-MRT-NSX-YZ9 | W2E    | Year 9     | Active             | 28 Sept 2026 |
| Penny Primary<br>primary.student@school.edu   | STD-PRM-RYX-YZ9 | WPR    | Year 3     | Pending activation | 28 Sept 2026 |
| Sam Suspended<br>suspended.student@school.edu | STD-SSP-NDD-XYZ | W2E    | Year 9     | Suspended          | 28 Sept 2026 |

Supervisors see the accounts in their own schools and the history, but cannot change anything.

**Question:** What else do supervisors need: reports, class overviews, usage?

**Not built yet in administration:** managing schools and classes, the course catalogue and course editor, the gradebook and transcripts, and Edmentum settings. These are Phases A to D.

## 7.1 Parent portal

● Partly done

The screenshot shows the 'Parent Test' interface within the 'Growth Hub' section of the 'WeLearn' platform. The header includes the 'WeLearn' logo and 'Growth Hub' text, with a 'PT Parent Test' dropdown menu on the right. The main heading is 'My children' with a subtext 'Read-only view of your children's learning.' Below this, there is a card for a child named 'Mia Chen' with a pink 'MC' icon and an 'Active' status. The card lists school details: 'School: Bangkok Campus (test)', 'Year level: Year 9', and 'Cohort: W2E'. A message box indicates that grades and progress will appear once the gradebook is live. Below the card is a 'Link a child' section with instructions to enter an invite code. A text input field contains 'ABCD-2345' and a green 'Link child' button is next to it.

**My children**  
Read-only view of your children's learning.

**Mia Chen**  
● Active

School: Bangkok Campus (test)  
Year level: Year 9  
Cohort: W2E

Grades and progress will appear here once the gradebook is live.

**Link a child**  
Enter the invite code the school gave you. Each code works once.

Invite code  
ABCD-2345 **Link child**

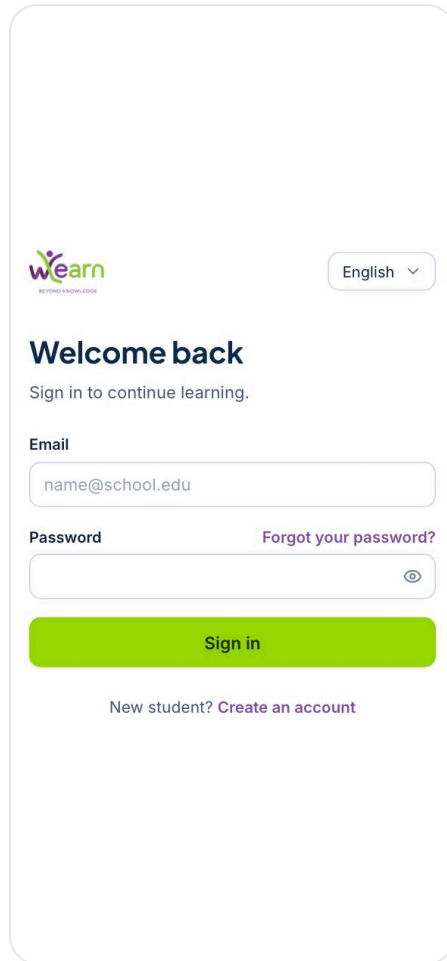

A read-only view of each linked child, and a box to link a child with the school's invite code. Grades and progress arrive with the gradebook (Phase D); the parental-consent step and weekly email summaries arrive in Phase E.

**Question:** What would parents most want to see here?

| <input type="checkbox"/> Independent security test and privacy review                                                                         | ● Needs school |
| <input type="checkbox"/> Pilot with one W2E class before opening to everyone                                                                  | ● Phase F      |

## C · Actions for the school (from the implementation plan)

| # | ACTION                                                                          | UNBLOCKS                            | STATUS |
|---|---------------------------------------------------------------------------------|-------------------------------------|--------|
| 1 | Approve the plan and budget; confirm the Platform Lead role with protected time | Every release                       | ● Open |
| 2 | Upgrade Firebase to the Blaze (pay-as-you-go) plan                              | Server, admin console and AI online | ● Open |
| 3 | Register WeLearn with Edmentum (LTI 1.3) and confirm licences                   | Edmentum in My Courses              | ● Open |
| 4 | Set up a Microsoft 365 no-reply mailbox for sending                             | Activation emails                   | ● Open |
| 5 | Supply the Firebase admin key securely to the Platform Lead                     | First admin accounts                | ● Open |
| 6 | Teaching leads list the tools and features they rely on daily                   | Build order                         | ● Open |
| 7 | Book a security test and privacy review                                         | Going live                          | ● Open |
| 8 | Define the Thai Diploma course, credits and transcript                          | Thai Diploma                        | ● Open |
| 9 | Native Thai speaker reviews the Thai interface                                  | Thai Diploma go-live                | ● Open |

## D · What comes next

| PHASE    | WHAT IT DELIVERS                                                                           | DEPENDS ON              |
|----------|--------------------------------------------------------------------------------------------|-------------------------|
| <b>A</b> | Server online, AI tutor live again, roles and cohorts, safe move of existing accounts      | Billing plan, mailbox   |
| <b>B</b> | One-click Edmentum from My Courses, with scores coming back                                | Edmentum registration   |
| <b>C</b> | Course catalogue, teacher uploads, Thai Diploma, primary-friendly and W2E support settings | Thai Diploma definition |
| <b>D</b> | Gradebook, terms and transcripts                                                           | Phase B                 |
| <b>E</b> | Parental consent and the full parent portal                                                | Privacy review          |
| <b>F</b> | Security test, training, pilot, then everyone                                              | Actions 7 and 1         |

In parallel, the front-end team will restyle the student Home, the activities and the coach dashboard, and build the school and class management screens.

# Issues found while preparing this review

10

| SCREEN       | WHAT WE SAW                                                                                                                                               | PLAN                                             |
|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------|
| 5.1          | The coach dashboard shows "Registered coaches: 0". Probably a side effect of the stricter privacy rules, which stop teachers reading other staff records. | Check and fix the count                          |
| 2.6          | Activity names, descriptions and the activity search stay in English when the language is Thai or Chinese.                                                | Translate activity content                       |
| 2.1          | An older goal-setting pop-up opens automatically when a student who has not set goals signs in, covering the page.                                        | Show it once, or on request                      |
| 2.3–2.5, 5.1 | Older dark design sits under the new white navigation. It works but looks like two products.                                                              | Restyle, starting with the most-used             |
| 8.3          | Wide tables on phones scroll sideways.                                                                                                                    | Card layout on phones, if wanted                 |
| 3.x          | A primary learner whose parent has not consented can still sign in (switched off on purpose while testing).                                               | Must be switched on before real primary learners |
| 6.x          | Records created by the set-up script showed dates in a format the screens did not expect (fixed on the screens; the server fix is on the list).           | Server fix in progress                           |

**About the test data.** Names such as Mia Chen, Penny Primary and Coach Rivera, and the "(test)" school names, are made up for testing. No real student data has been used anywhere.

**The one thing you would add or change first:**
